50X1

1. In an unpopulated and hilly area in the Borzsony Mountains, about one third of the way from Diosjeno to Kemence, a large unexploded shell was found which was lying in the middle of a deeply gorged and partly dried creek bed.
2. A photograph of the shell was taken from a distance of approximately six feet. It was estimated that the shell was 15" to 20" long and 8" to 9" in diameter. In this same area also five or six large fragments of shells were seen, which were slightly rusted from exposure.

50X1

Comment: This evidence would indicate that this had been a target area for artillery. However, no shell fragments or unexploded ammunition was seen on a previous excursion to the same area in the fall of 1953.

Photograph of the shell described in paragraph 1, is available in the CIA Graphics Register.
